READING, Pa., February 20, 2009 – EnerSys® recently expanded its product line to include the ODYSSEY® 34R-PC1500 battery, a modification of the ODYSSEY® 34-PC1500 battery with reversed terminal polarity. The ODYSSEY® 34R-PC1500 battery is most notably suitable for Automotive/LTV and Heavy Duty/Fleet applications that require batteries with reversed terminal configuration. In addition, the ODYSSEY® 34R-PC1500 battery can be used with a spacer to fit BCI sizes 24F, 24R and 27F.

“The ODYSSEY® 34R-PC1500 battery allows us to broaden our capabilities for applications and provide more availability to our consumer base,” said Dave McMullen, Director of Marketing for EnerSys®. “Now that we have product available for applications that require these specialty batteries, we look forward to continuing ODYSSEY® Battery’s presence in this segment of the market.”

The ODYSSEY® 34R-PC1500 battery is a 12-Volt drycell battery with cold cranking amps (CCA) of 880. It also offers 135 minutes of reserve capacity and a deep cycle capability of 400 cycles at 80% depth of discharge (DOD). Additionally, the ODYSSEY® 34R-PC1500 comes with a 4-year warranty.
